SUMMARY

Results-oriented Software Engineer, boasts a rich 1.5+ years of experience in frontend development, specializing in React.js, JavaScript, HTML, and CSS. My journey is marked by successful collaborations with clients on various projects, a testament to my ability to deliver solutions that meet and exceed their expectations. Proficient in Agile methodology, Git, and JIRA, I thrive in dynamic, large team environments.

WORK EXPERIENCE

Ksolves India Limited, Indore, India

Software Engineer

September, 2022 – Present

- Spearheaded as a pivotal React JS Developer, actively contributing to the success of numerous projects by blending expertise in React.js.
- Engaged seamlessly within expansive teams comprising both frontend and backend developers, fostering collaborative environments.
- Provided invaluable support to client and QA teams, **ensuring the delivery of high-quality solutions within specified timelines.**
- Demonstrated versatility by navigating legacy React projects with finesse while staying at the forefront of technology.
- Proactively **integrated the latest React libraries into ongoing projects, enhancing functionality and user experience.**
- Played a crucial role in shaping the architecture of large-scale React projects.
